Kanex High Speed Micro HDMI Cable - 6 ft (1.8 m)

The Kanex High Speed Micro HDMI cable with Ethernet is a premium grade cable designed with ultra-flexibility in mind for you to connect your portable devices to HDMI displays. Now you can display your movies, photos, and videos straight from your handheld devices such as cell phones, digital cameras, and video cameras.For instance, record movies on your handheld Flip Ultra*HD* 8GB and watch instantly on your display.

More Bandwidth

HDMI High Speed with Ethernet supports bandwidth up to 10.2 Gbps, and consolidates Ethernet channel for networking your HD video, audio and data in a single cable solution.

3D TV

3D Anytime, Anywhere

The Kanex High Speed Micro HDMI cable is 3D compatible and will allow you to view your handheld device's content on a 3D display. View your recorded movies and pictures directly on your 3D HDTV from your phone, portable device, or 3D camera.

HDMI Micro HDMI

Big features in a small package

The "Type D" Micro connector is approximately the size of a Micro USB connector, yet it can deliver full 1080p resolutions for portable devices. This tiny form factor supports Ethernet and all the benefits of HDMI without the bulk.

HDTV

One cable, two features

Full HD video and digital surround sound support through the Kanex High Speed Micro HDMI cable offers endless viewing capabilities on your HDTV.

Flip Ultra*HD* 8GB

Skip to the best part

Using the Kanex High Speed Micro HDMI cable allows you to bypass uploading the files to your computer, and view them straight from the Flip Ultra*HD* 8GB to your HDTV instantly. Show your friends your latest pictures or movies in one simple connection.

Smart Phones

Portable HDMI

With more and more handheld devices featuring Micro HDMI ports, the Kanex High Speed Micro HDMI cable will keep you ahead of the curve. Show off your media anywhere there is a HDMI display available.
